

THE AMERICAN FORESTRY ASSOCIATION
919 17th St. N. W., Washington, D. C.

REPORT ON AMERICAN BIG TREES

The following trees are the largest of their species reported up to June 15, 1941, in The American Forestry Association's campaign to locate and preserve the giant specimens of American trees. The challenge to all tree lovers is to locate and report trees larger than these, if they exist. Reports on giants of species not listed are also desired. Send all information to the Association at the above address.

Species	Circumference at 4½'	Spread	Height	Location
<u>ASH</u>
